## DISPOSABLE CUBICLE CURTAINS

Disposable ● Antimicrobial ● Economical

## Why Change to Disposable Curtains?

### Antimicrobial

EPA-registered silver additives are built directly into the fabric's polymer structure, ensuring lifelong effectiveness that can never wash or wear off.

### Flame Retardancy

Proven to meet international Flame Retardant Standards:

- NFPA 701:2010 (USA & Canada)
- BS 5867 Part 2 Type C 2008 (UK & Europe)
- AS 1530.3:1999 (Australia & New Zealand)

### Cost Effective

In comparison to conventional cubicle curtains, DuraNET hospital disposable Curtains offer:

- Low purchase costs
- No laundry costs
- No maintenance costs

### Quick to Change

The curtains have been designed to be fully compatible with existing popular tracks. The curtains weigh far less than conventional curtains and so are easy and quick to install and change in less than 30 seconds!

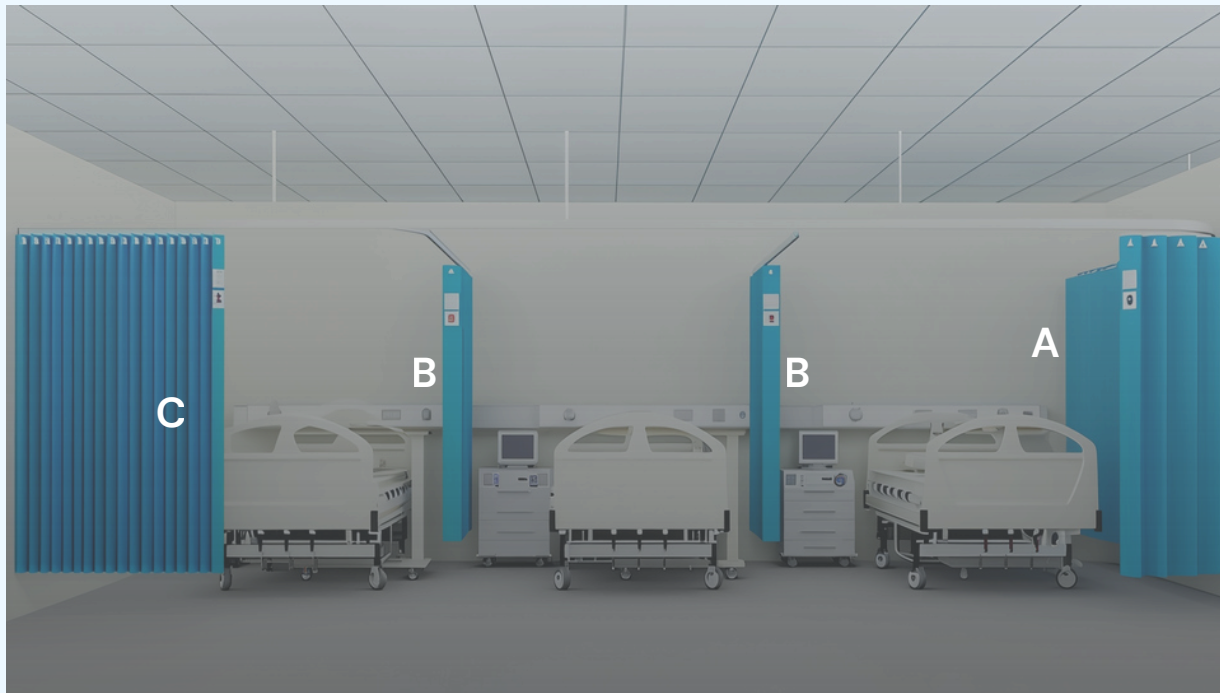

### 100% Recyclable

DuraNET disposable cubicle curtains are made of 100% polypropylene non-woven, are 100% recyclable as non-clinical waste, so when it is time for replacement they can be disposed of safely and environmentally.

# DuraNET Curtain Selection Guide

## Curtains with or without mesh

### 1. Curtain Width

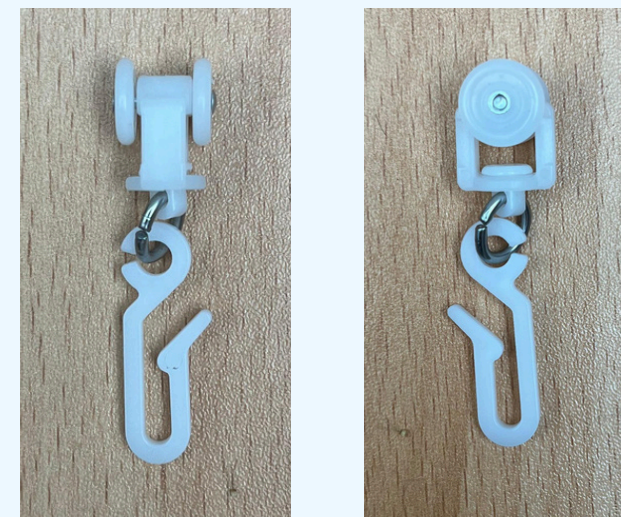

The most common widths for cubicle are: 7.5m for long section (Curtain A & B), 4.5m for middle section (Curtain C). 2.5m, 3m and other sizes are available for different cubicles.

### 2. Curtain Drop

The most common drop for track suspended from ceiling is 2m. (Drawing 1) Extra drop with 10cm-80cm of mesh top for track fixed to ceiling to help meet fire codes by allowing light, water and air circulation. (Drawing 2)

### 3. Hooks

The most common widths for cubicle are: 7.5m for long section (Curtain A & B), 4.5m for middle section (Curtain C). 2.5m, 3m and other sizes are available for different cubicles.

## Disposable Cubicle Curtains

### Material: 100% polypropylen

DuraNET disposable curtains are made from 100% polypropylene non woven fabric (100gsm), extremely durable and can last for over 12 months. It has one of the lowest environmental impacts of any material—synthetic or traditional.

### Stitched tieback: Extra wide stitched tieback

The curtains are pre-pleated and when not in use can be folded back into a much smaller stack thus allowing better light distribution for a brighter environment. Each curtain is fitted with a stitched extra wide tieback with VELCOR sticker which secures the curtain neatly when not in use.

### Customised labelling system: 2 identification labels

Two clear and simple permanent heat sealed self-auditing labels on each curtain allows anyone to see when the curtain was last changed. And the clear NO ENTRY mark to provide patients privacy.

### Infection control: DuraNET UltraCare silver antimicrobial additives

DuraNET UltraCare silver antimicrobial additives (EPA registered) are not a spray-on, but built into the polymer structure of the non-woven fabric at the point of manufacture. The antibacterial active is evenly distributed throughout the whole curtain. Its effectiveness will last the life of the curtains.

### Flame retardancy: BS 5867 Part 2 Type C compliant

DuraNET disposable cubicle curtains comply with the same fire retardancy standards as conventional cubicle curtains: BS 5867 Part 2 Type C 2008 (British standard) and NFPA 701: 2011 (North American standard). AS 1530 (Australian Standard). We test every batch of every colour.
